3 Levels of Security

With 22 Secure Checkpoints

Applicant Entry

1. Secure applicant entry
2. Applicant entry times out
3. Applicant entry is only valid once
4. External firewall
5. External data dies when not used

SELECTiON.COM® offers a secure applicant entry system. The system will automatically time-out to prevent unauthorized access, and the applicant entry page is available to the applicant only once.

Client Interface

6. 256-bit encryption
7. Unique & complex Password protection
8. 2nd Firewall

Our 256-bit encryption, unique and complex password protection, and 2nd firewall provide further security to your applicant's personal information

Back-End

9. Stand alone development site
10. Data only resides on our servers, not client's browsers
11. Data is archived, for extra security
12. Protection against power outage
13. Continuous backups of all data scheduled routinely
14. 3 Levels of physical security for our servers
15. All data is physically located in-house
16. No 3rd party access
17. Internal security policies enforced
18. Background checks on employees
19. *Professional code of conduct
20. *Faith-based business
21. Security policies are audited
22. No back door access to our data

Our customer satisfaction statement is, "What separates TRUE customer satisfaction from mere lip service is the WILLINGNESS to put the SELECTiON.COM® customer FIRST in EVERYTHING we do!"

SELECTiON.COM® has a variety of background check services, which can be customized not only for your company, but for the position you are hiring for.
